DETAILED ACTION

Claims 1-23 are pending in the application

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 13-23, drawn to a process for producing benzyl bromide classified in class 570, subclass 192.
- II. Claims 7-12, drawn to a process producing benzal bromide classified in class 570, subclass 192.

The inventions of Groups I and II are distinct, each from the other because:

There is no patentable co-action between the two groups and prior art anticipating and/or rendering one invention obvious would not necessarily anticipate or render obvious the other invention. Thus, causing an undue burden of search.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other Group, restriction for examination purposes as indicated is proper.

A telephone call was made to Edgar E. Spielman, Jr. on 4/22/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
